

Climadiff - 160 Bottle Multipurpose Wine Preservation Unit PCLP160

Climadiff have been manufacturing their wine cabinets since the 1990's and are synonymous in the world of wine storage. Most of their wine cabinets are dedicated to long term storage with capacities ranging from 116 bottles right up to 294 Bordeaux bottles for the larger models. Their cabinets are based on functionality and reliability, generally the cabinets aren't packed full of new technology and are there to serve as a storage cabinet only. Without all the fancy gadgets the Climadiff units are renowned for their reliability which makes these units ideal for long term storage as they keep ticking over for many years.

Freestanding Storage Wine Cabinet

The PCLP160 is a freestanding wine cabinet that is designed with long term storage and serving in mind, the solid door ensures a constant temperature throughout the cabinet and complete darkness for your wines to mature. You can be sure that your wines are in safe hands as the door is completely UV treated. There are 2 adjustable feet at the front for uneven ground and also two caster wheels to the rear which allow for easy manoeuvrability for when the cabinet needs to be moved.

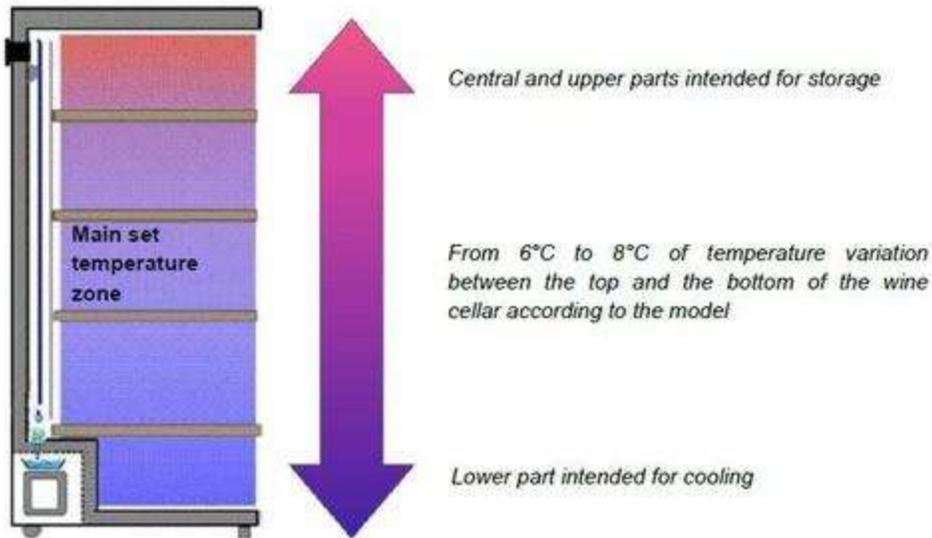

A freestanding wine cabinet should have 5-10cm of ventilation space around the sides and rear to ensure there is enough cool air to cool the compressor.

Interior and Capacity

The PCLP160 has a high capacity of 160 Bordeaux bottles which is achieved by stacking the bottles on the 2 full wire shelves and 1 half wire shelf that can be positioned anywhere in the cabinet to maximise the storage potential. A charcoal filter and vibration free system means your wines will be stored in an odourless, vibration free environment which is perfect when it comes to long term storage. The interior is manufactured from black sheet metal which helps with moisture regulation inside the cabinet and therefore humidity control.

Polyvalent technology

The PCLP range from Climadiff has the ability to act as a storage cabinet and a serving cabinet. By turning the internal fans off, you can create multiple temperature zones inside the cabinet with the coolest zone being at the bottom and the warmest zone at the top. The wine cabinet can also be used as a single temperature zone model as well which makes it ideal for long term storage as well.

Efficiency and Winter System

The PCLP range is quiet freestanding unit with an operating noise of only 43dB and are quiet energy efficient with an energy rating of A. The PCLP range also comes equipped with the winter system that is required by so many wine enthusiasts to ensure the correct storage conditions when the cabinet is located in an insulated garage or out building.

The winter system has a much thicker layer of insulation and an internal heating element which is used to raise the internal temperature if the ambient temperatures drop to lower temperatures. The winter system gives your wines security for ambient temperatures between 0 and 32°C and will ensure the set temperature is maintained to within +/-2°C - the PCLP160 is an ideal multifunctional wine cabinet.

Climadiff PCLP160 Product Specification

- Max Bottle Capacity: 160 Bordeaux Bottles
- Energy Efficiency Class: A
- Energy Consumption kWh/annum: 162
- Noise Output: 43dB
- Climate Rating: T (+16 to +43°C)
- Voltage: 220-240V
- 2 year parts and labour warranty with all Climadiff Wine Cabinets
- Ambient temperature use: 0 - 32°C

Controls:

- 1 Electronic temperature display integrated into the door (White)

General Features:

- Black exterior with black interior
- Black control panel
- Solid door with silk screening to the rear
- 2 Adjustable feet, 2 caster wheels
- Compressor cooled: static cooling or fan assisted
- Automatic defrost
- 100% UV light protection
- Charcoal filter
- Vibration free compressor
- Winter system

Interior Features:

- 1 temperature zone: Operating between 5-20°C
- Multi Temperature zone function
- Electromechanical Regulation
- Humidity management between 55-85% (Automatic)
- 2 fixed wire shelves
- 1 half wire shelf

Dimensions:

- Height: 129.4cm
- Width: 59.5cm
- Depth: 71cm

Weight: 52kg

Delivery

Customers are advised to check the product dimensions to ensure the unit will fit through all doorways and please tell us about any obstructions, including steps and narrow passageways so we can make the necessary arrangements for the delivery.

Non-stock delivery lead time (working days)	Kerbside	2-Man (ground floor only)
UK mainland	N/A	2 - 5
Northern Ireland	7 – 10	10 - 14*
Republic of Ireland	7 - 10	10 - 14*

*Additional cost applies.

All 2-man deliveries are to the ground floor only, which includes to the room of choice, unpack, position and removal of packaging (excludes the Scottish highlands and Channel Islands). Removal and disposal of an old appliance is not included as part of our standard delivery service.

Please note the product can be out of stock which may increase the lead times. For any other area's not listed above - contact us directly for delivery costs and information.

Installation

Freestanding Wine Cooler:

Freestanding wine coolers are designed to stand alone and not be built in to any cabinetry at all, we recommend a minimum ventilation space of 3-5 inches around the sides and rear of the unit. Do not install a freestanding unit under a counter top.

Built-in / undercounter wine cooler:

A built in wine cooler is designed to be surrounded by cabinetry or can be utilised as a freestanding unit, this type of unit has a grille at the front to allow cool air to be drawn in.

Integrated Wine Cooler:

Integrated wine cabinets are similar to built in wine coolers but are designed to slot into cupboards to create a floating look.

Thermoelectric Wine Cooler:

Thermoelectric wine coolers should never be built into cabinetry or have the ventilation limited in any way. They are designed to sit on the floor or smaller units are perfect for installation on a counter top.

If you have any questions, regarding the installation of your wine cooler or which unit you need, please contact us before purchasing.
