

Climadiff - 294 Bottle Ageing Wine Cabinet CV295 Red Burgundy

Climadiff are a French manufacturer of wine cabinets who have been producing their wine cabinets since the late 1990's, just after Eurocave started. They were amongst the first companies to enter into the industry and since then have developed a reputation for reliable and robust storage cabinets. Their focus is primarily on long term storage cabinets or ageing cabinets, however they do have a small range of freestanding and built in wine coolers for customers who do not require such large capacities or don't plan to keep their wines for 5 years or more.

Freestanding Ageing Wine Cabinet

The Climadiff CV295 is a large capacity freestanding ageing wine cabinet which is designed for long term storage of wines. This exterior is manufactured from burgundy sheet metal which features a solid door to create complete darkness inside the cabinet and prevent any UV damage and also a lock to keep your wines safe. 2 wheels at the back of the unit allow you to manoeuvre the cabinet easily and a thermometer with electronic display ensures you can keep a close eye on your wines at all times. A freestanding wine cabinet should have 5-10cm of ventilation space around the sides and rear to ensure there is enough cool air to cool the compressor.

Interior and Capacity

The CV295 has a very high capacity of 294 Bordeaux bottles which is achieved by stacking the bottles on the 4 Premium shelves that are supplied with the unit, to allow easy access to a small collection of your favourite wines. White LED lighting ensures there is enough light inside when the door is open and a charcoal filter ensures no bad odours linger inside the wine cabinet. The inside of the cabinet is manufactured from black sheet metal which helps with humidity regulation.

Efficiency and Winter System

Climadiff's ageing cabinets are highly energy efficient with the CV295 being rated as A for energy usage and they all feature the winter system which ensures peace of mind when installing in an insulated garage or out building. The winter system features an internal heating element and a much thicker layer of insulation than usual which helps with temperature regulation. The CV295 is suitable for ambient temperatures of between 0 and 32°C and will maintain the internal temperature within +/-2°C which makes these units a great choice for customers looking for a long term storage cabinet.

Differences between CV295 and CV297

Both units are fundamentally identical in terms of components and the way they cool/maintain temperature, the CV295 has the added benefit of the register being printed on the back of the door so you can record the location of your wine - everything else is the same.

Differences between CLA310A+ and CV295

Aesthetically they are similar apart from the colour of the cabinet, the CLA310A+ is Brown vs Burgundy of the CV295. The CLA310A+ has slightly upgraded internal components which means it is A+ energy rated vs A of the CV295. The CLA310A+ also comes with 1 sliding shelf, increasing the total number of shelves to 5 vs the 4 of the CV295 - The base model of all three units above is the CV297 so if you do not need the additional features, the entry level unit will suffice! All are manufactured in Portugal.

Climadiff CV295 product specification

- Max Bottle Capacity: 294 Bordeaux Bottles
- Energy Efficiency Class: A
- Energy Consumption kWh/annum: 153
- Noise Output: 43dB
- Climate Rating: SN (+16 to +32°C)
- Voltage: 220-240V
- 2 year parts and labour warranty with all Climadiff Wine Cabinets
- Manufactured in Europe
- Ambient temperature use: 0 - 32°C

Controls:

- 1 Electronic temperature display (Red)

General Features:

- Burgundy sheet metal exterior with black metal interior
- Black control panel
- Solid door with silk screening on inner side
- 2 Adjustable feet, 2 caster wheels
- Compressor cooled: static cooling system
- Automatic defrost
- 100% UV light protection
- Charcoal filter
- Vibration free compressor
- Winter system

Interior Features:

- 1 temperature zone: Operating between 12°C +/-2°C
- Electromechanical Regulation
- Humidity management between 55-85% (Automatic)
- White LED lighting
- 4 Fixed Premium 1/70 Shelves

Dimensions:

- Height: 183cm
- Width: 70cm
- Depth: 71cm

Weight: 79kg

Delivery

Customers are advised to check the product dimensions to ensure the unit will fit through all doorways and please tell us about any obstructions, including steps and narrow passageways so we can make the necessary arrangements for the delivery.

Non-stock delivery lead time (working days)	Kerbside	2-Man (ground floor only)
UK mainland	5 - 7	10 - 14
Northern Ireland	10 - 12	10 - 14*
Republic of Ireland	10 - 12	10 - 14*

*Additional cost applies.

All 2-man deliveries are to the ground floor only, which includes to the room of choice, unpack, position and removal of packaging (excludes the Scottish highlands and Channel Islands). Removal and disposal of an old appliance is not included as part of our standard delivery service.

Please note the product can be out of stock which may increase the lead times. For any other area's not listed above - contact us directly for delivery costs and information.

Installation

Freestanding Wine Cooler:

Freestanding wine coolers are designed to stand alone and not be built in to any cabinetry at all, we recommend a minimum ventilation space of 3-5 inches around the sides and rear of the unit. Do not install a freestanding unit under a counter top.

Built-in / undercounter wine cooler:

A built in wine cooler is designed to be surrounded by cabinetry or can be utilised as a freestanding unit, this type of unit has a grille at the front to allow cool air to be drawn in.

Integrated Wine Cooler:

Integrated wine cabinets are similar to built in wine coolers but are designed to slot into cupboards to create a floating look.

Thermoelectric Wine Cooler:

Thermoelectric wine coolers should never be built into cabinetry or have the ventilation limited in any way. They are designed to sit on the floor or smaller units are perfect for installation on a counter top.

If you have any questions, regarding the installation of your wine cooler or which unit you need, please contact us before purchasing.
