

La Sommeliere - 160 Bottles Large Multiple Zone Wine Cabinet VIP150

La Sommeliere is a French manufacturer of premium wine cabinets and coolers which is also owned by the FRIO Enterprises group. With a wide range of different freestanding and built in options, they offer units that are different to standard units in the European market. All La Sommeliere units come with a 2 year parts and labour warranty which is supported by a network of technicians throughout the UK.

Wine Storage Compartment

With a capacity of 160 Bordeaux bottles, this model is one of the most popular wine cabinets. The bottles are supported on solid beech wood shelves which are fixed in place, the shelves can be moved around the cabinet to accommodate your collection. White LED lighting lights up the inside of the cabinet to ensure the bottles are easily visible. There is also a carbon filter to control odours, anti vibration system to minimize unnecessary movement and the double glazed door is fully UV treated to ensure no UV light enters the cabinet.

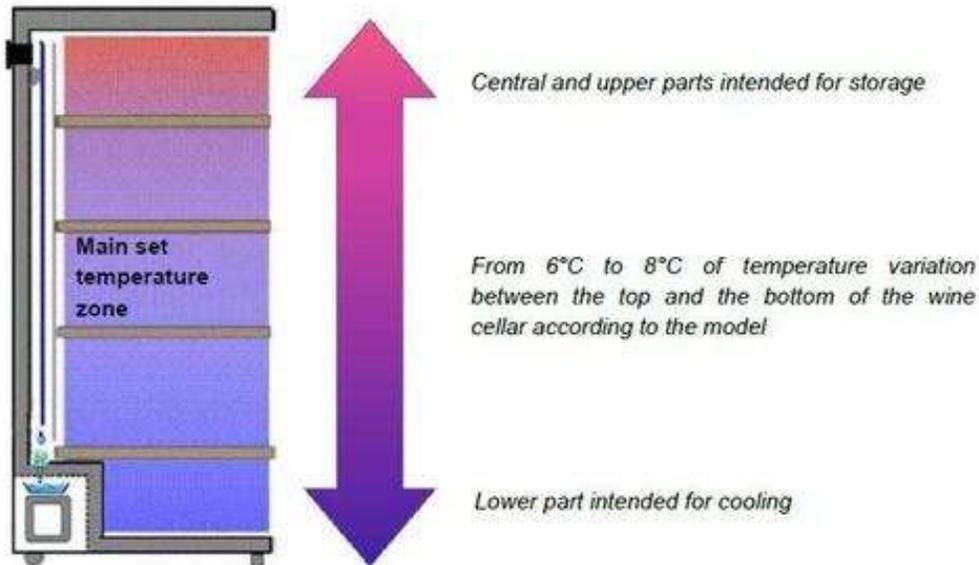

Single or Multi Zone Wine Cabinet:

The La Sommeliere VIP150 is a single or multi temperature zone wine cabinet which can be utilised by using the digital control panel. By turning the inner fans off you create multiple temperature zones inside the cabinet like the image below. You can also use this unit as a single temperature zone wine cabinet for one single temperature throughout the cabinet.

Multi zone cabinets feature polyvalent technology which effectively means the cool air is introduced at the bottom of the wine cabinet which naturally warms and rises up. This creates 5 naturally independent temperature zones which means you can store white wine at serving temperature in the lowest zone, store wines in the middle zone and then reds at serving temperature in the upper zone.

Manufactured in Europe

La Sommelieres Prestige range is manufactured in Europe and are constructed from high quality components. The prestige range comes with a 2 year manufacturers warranty which includes parts and labour and on site support.

La Sommeliere VIP150 Specification:

- Multi purpose ageing and serving freestanding wine cabinet
- 160 Bottle Capacity (750ml standard Bordeaux bottles)
- Single or Multi temperature zone
- Internal operating temperatures: 5-22°C

Cooling system:

- Fan assisted or polyvalent mode
- Compressor driven which is mounted on vibration free mountings
- Automatic defrost

Performance and Consumption:

- Noise level: 40dB
- A Energy Class: 209kW/annum
- Climate Class: 'SN-T' (10-43°C)

Dimensions:

- Height: 1550mm
- Width: 595mm
- Depth: 595mm

Package dimensions:

H.16150 x W.625 x D.670 mm

Weight: 75kg

Delivery

Customers are advised to check the product dimensions to ensure the unit will fit through all doorways and please tell us about any obstructions, including steps and narrow passageways so we can make the necessary arrangements for the delivery.

Non-stock delivery lead time (working days)	Kerbside	2-Man (ground floor only)
UK mainland	5 – 7	10 - 14
Northern Ireland	10 – 12	10 - 14*
Republic of Ireland	10 - 12	10 - 14*

***Additional cost applies.**

All 2-man deliveries are to the ground floor only, which includes to the room of choice, unpack, position and removal of packaging (excludes the Scottish highlands and Channel Islands). Removal and disposal of an old appliance is not included as part of our standard delivery service.

Please note the product can be out of stock which may increase the lead times. For any other area's not listed above - contact us directly for delivery costs and information.

Installation

Freestanding Wine Cooler:

Freestanding wine coolers are designed to stand alone and not be built in to any cabinetry at all, we recommend a minimum ventilation space of 3-5 inches around the sides and rear of the unit. Do not install a freestanding unit under a counter top.

Built-in / undercounter wine cooler:

A built in wine cooler is designed to be surrounded by cabinetry or can be utilised as a freestanding unit, this type of unit has a grille at the front to allow cool air to be drawn in.

Integrated Wine Cooler:

Integrated wine cabinets are similar to built in wine coolers but are designed to slot into cupboards to create a floating look.

Thermoelectric Wine Cooler:

Thermoelectric wine coolers should never be built into cabinetry or have the ventilation limited in any way. They are designed to sit on the floor or smaller units are perfect for installation on a counter top.

If you have any questions, regarding the installation of your wine cooler or which unit you need, please contact us before purchasing.
